SITE's Executive Director, Jeremy Bennett, introduced this month's speakers Scott Colbert, CFA Executive Vice President, Chief Economist and Director of Fixed Income Management, at Commerce Trust Company who spoke about the Economic Climate and Potential Impact to our Industries in the Future.

The contraction during the pandemic was the worst in the nation's history, and now the country's GDP is approximately 6% higher than it was at the beginning of the pandemic, inflation-adjusted.

The AEC industry seems to be doing well, but the nature of the business is lagging. However, there are leading edge indicators that the economy is slowing. The major question is if we are just cooling, or if we are headed towards a recession.

Derek Koestel presented Scott with a gift card and certificate of appreciation.

John made a few final announcements to close the meeting:

- There is no business meeting for the Branch in November Branch Meeting, hope to see you all at the Chapter Conference in Columbia next week.

We have a couple of presentations that are already made, or you can revise it to your experiences.

Please contact Amy Touchette Brown @ atouchettebrown@cdgengineers.com if you are interested.
